

Indirect Luminaires

**Designers & Manufacturers
Commercial & Industrial
Fluorescent Lighting Fixtures**

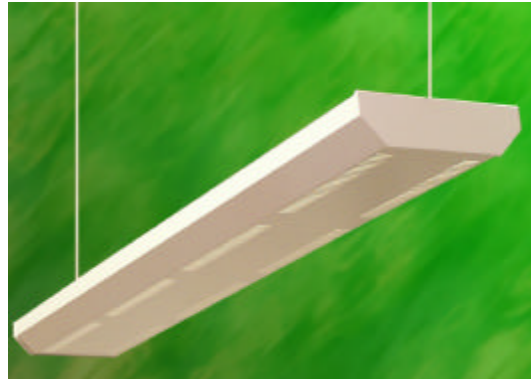

50,000 Sq.Ft. Manufacturing Facility
Los Angeles Lighting Mfg. Co.
El Monte, CA

L.A. Lighting specializes in the manufacture of fluorescent lighting fixtures in support of the construction industry. We have built our reputation by offering cost effective state-of-the-art fluorescent products delivered in accordance with our customer's job requirements.

L.A. Lighting is committed to the lighting specifier, electrical distributor and electrical contractor in our mutual endeavor to provide the construction industry with the highest level of products and service.

PID200 Series

The PID200 series provides a comfortable and uniform indirect ambient illumination throughout the space, and reduces the reflected glare typically found on computer screens. The clean, simple and compact profile will go with many different types of interior styles.

The PID200 series creates an environment with a high level of visual comfort and is an ideal luminaire for office areas, libraries, conference rooms and classrooms.
