## VALUE TALK

Los Angeles Lighting Manufacturing Company was established in 1988 and remains family owned. Knowing the current climate at the time of establishment, Bill knew that he would have to differentiate L.A. Lighting from the rest of the competition.

30 years later this same philosophy is still the core of the business model. In addition to manufacturing a standard line of products, L.A. Lighting sets itself apart by doing what others cannot; offering fixtures for custom request, providing solutions for challenging requests, while building products right here in the U.S.A.

## WHY L.A. LIGHTING FIXTURES?

All of L.A. Lighting products are Designed and Manufactured in Los Angeles. Always with an eye to the future and a hand in the here and now, "Quality, Innovation, and Reliability" best describes the L.A. Lighting team's agenda. With design, development, sales and manufacturing under one roof, our vertically integrated manufacturing facility gives us control to manufacture any standard, custom, or modified order with complete control over quality, production schedules and shipping. Your non-standard need is our standard product. DESIGN, DEVELOP, DELIVER... IT'S JUST THAT SIMPLE!

**We incorporate the highest quality State-of-the-Art components from Top Tier Vendors.**

Superior products are born from superior components. From the global leaders such as Philips, Samsung, ULT, Osram-Sylvania comes product that is second to none in performance and sustainability. Partnering with names like Lutron, Leviton, EnOcean, and Watt Stopper can only mean one thing... THE BEST OF THE BEST IS BUILT INTO EVERYTHING WE DO!

**Our LED luminaires are 100% tested before shipping.**

In many manufacturing arenas a quality sampling of less than 3% with a 10% failure rate is acceptable. NOT at L.A. Lighting. We test each and every LED fixture resulting in an industry leading 99.97% reliability rate. YOUR CONFIDENCE IS OUR CROWN.

*"When you call L.A. Lighting, you are talking to  
the factory."*

---

From simple questions to the most technical information, our interactive Sales Service professionals are ready, willing and more than able to bring you the same high level of quality in Customer Service as we do in our finished products. Open & easy communication is the hallmark of L.A. Lighting's 30 years filling the needs of our customers. OFTEN ENVIED, RARELY DUPLICATED!

# TUNABLE WHITE + HUMAN CENTRIC LIGHTING

Human Centric Lighting can improve people's motivation, well being, and productivity, which is where tunable white comes in. Tunable white uses two controllable channels to adjust the color temperature and lumen output. The channels in a tunable white system all produce white light but with varying color temperatures. With tunable white capabilities, you have the ability to tune the color of your luminaires with an infinite color range available from 2700K warm tones through 6500K cool tones and everything in between.

## CONTROLS + CONTROLS SYSTEMS

Shown below are some of the controls manufacturers and controls systems that Los Angeles Lighting works in conjunction with. As an independent manufacturer, L.A. Lighting has the flexibility to integrate the controls of your choice into our lighting fixtures.

## FLUORESCENT + HID CONVERSION CHARTS

These conversion charts are approximations of the LED lumens required to replace your existing Fluorescent and HID fixtures. Fixture mounting height, on-center spacing, and other factors will affect the LED lumens needed. Actual result will depend on the luminaire itself.
