

HBN100/200

Wire Guard Installation Instructions

Wire Guard Number	Luminaire	Length
WG11-HBN100-2L	HBN100 (LED)	2'
WG11-HBN100-4L	HBN100 (LED)	4'
WG11-HBN100-2	HBN100 (Fluo/LED Tube)	2'
WG11-HBN100-4	HBN100 (Fluo/LED Tube)	4'
WG11-HBN200	HBN200 (LED/Fluo/LED Tube)	4'

Note: 8' Luminaires require two 4' wire guards.

All Wire Guard orders include:

1x Wire Guard (2' or 4')

4x U-Type Self-Retaining Nuts

4x Thumb Screws

STEP 1

Install self-retaining nuts in grooves along sides of luminaire housing. Flat surface of nut must face outside, and holes in nuts must align with holes in housing.

STEP 2

Align wire guard clips to luminaire housing, making sure the long side of the clip is positioned closer to the upper (closed) side of the housing.

STEP 3

Install the wire guard under the wire guard clip and tighten thumb screws until the wire guard is firmly secured to the housing. Make sure wire guard is positioned inside ends of housing.

Wire guard installed on 4' HBN100
