

“YES WE CAN DO THAT!”

For 35 years, L.A. Lighting has been giving its customers a very simple answer when it comes to requests for non-standard luminaires: “Yes, we can do that!” These non-stocked, made-to-order products are typically ready in **7-14 working days**, to help you win that urgent project. Here are just a few examples of non-standard options we’re ready to tackle:

Lumen Packages

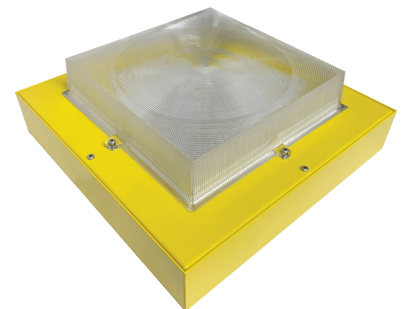

Looking for a 4ft vapor tight in 8000 lumens? No problem. Non-standard lumen packages are what we do, including High Efficiency and High Temperature options.

Color Temperatures

Our factory is stocked with hundreds of thousands of LED boards in a range of color temperatures, plus colored LEDs and tunable white.

Custom Paint or Finishes

From a bright orange troffer to a jet black strip to a cleanroom fixture with antimicrobial finish, we’ll give you the look you need fast.

Battery Packs, Lenses, and More

A good manufacturer will never pull the plug on your options! Whether you need switches, gasketing, or other options, we’re ready to deliver quickly.

Sensors and Controls

As an independent, controls-agnostic manufacturer, we’ve got the unique ability to integrate a wide range of controls technologies into our luminaires. This flexibility allows us to provide the exact controls solution your customer requires.

So when you need a made-to-order luminaire quickly, especially one that requires non-standard options, don’t hesitate to contact L.A. Lighting. And remember:

Yes, we can do that!
