

Small Size Serious Strength

The BDL100 from L.A. Lighting is a robust, 13" square LED fixture built for interior applications where durability is essential. Its heavy-duty cold-rolled steel housing and impact-resistant polycarbonate lens make it an excellent choice for high-traffic areas that are prone to abuse.

Despite its compact footprint, the BDL100 delivers powerful, efficient illumination, and is compatible with a wide range of sensors and controls, making it an energy-saving solution for schools and government buildings.

Applications

Restrooms, Locker Rooms, Stairwells, Corridors, Utility Rooms
